## OBJECTIVE

Computer Science undergraduate with experience in Python, Java, and AI-based automation projects. Strong analytical, communication, and teamwork skills with exposure to collaborative team environments.

## EDUCATION

B.Tech (CSE), GITA Autonomous College | CGPA: 7.6 | 2022–2026

CHSE (Class XII), Rural Institute of Higher Studies | 70% | 2022

BSE (Class X), Prafulla Pankajini Vidya Mandir | 68% | 2020

## SKILLS

**Programming Languages:** Python, Core Java

**Web Technologies & Frameworks:** HTML, CSS, JavaScript, Django

**Database Systems:** SQL, MySQL

**Development Tools:** VS Code, IntelliJ IDEA, Git, GitHub, AWS, MS Excel, PowerPoint, Word

**Concepts:** OOP, Software Development Life Cycle (SDLC), Agile Methodology

**Behavioral Skills:** Communication, Problem Solving, Teamwork

## INTERNSHIP EXPERIENCE

**Software Developer Intern – AI/ML | Infosys**

Oct 2024 – Jan 2025

- Received hands-on training in **AI-driven document automation** using OCR, NLP, and data processing techniques for financial documents.
- Contributed to the development of an **OCR-based document analysis application** for BFSI use cases under mentorship.
- Processed and analyzed **500+ financial data records** as part of model evaluation and performance improvement.
- Collaborated within an **Agile team**, participating in code reviews and iterative development activities.
- Gained practical exposure to **LLM-powered scalable solutions**, focusing on inference optimization and system efficiency.

## PROJECTS

**Self-Initiated Research Agent** [↗](#)

**Technologies:** Python, Django, NLP, Hugging Face (BERT, BART), FAISS, REST APIs, JavaScript, HTML, CSS.

- Built a **self-initiated autonomous research system** to perform web research, summarization, and knowledge synthesis.
- Designed a **multi-agent workflow** for query breakdown, information retrieval, fact-checking, and memory-based follow-ups.
- Stored past research insights and **used them to answer future queries**.
- Automated **structured report generation with citations**, significantly reducing manual research effort.

**BFSI – OCR of Bank Statements** [↗](#)

**Technologies:** Python, PaddleOCR, Cohere API, OpenCV, Gradio, Cloudinary, Matplotlib, Pandas.

- Designed and implemented an end-to-end OCR pipeline to extract structured data from diverse BFSI documents.
- Applied NLP models to process extracted text and generate structured financial insights.
- Developed an interactive UI using **Gradio** and connected **Cloudinary** for seamless image retrieval and document processing.
- Created financial visualizations using Matplotlib and Pandas with bar and pie charts.
- Business Impact:** Reduced manual document processing effort through end-to-end automation.

## Certifications

- SAP Certified Associate – Back-End Developer (ABAP Cloud) – SAP | 2026**
- Artificial Intelligence Primer – Infosys Springboard | 2024**
- Principles of Generative AI – Infosys Springboard | 2024**
